TINT N PRIME

HIGH PERFORMANCE TINTABLE PRIMER

TECHNICAL DATA SHEET

Tint N Prime is a high performance, acrylic tintable primer. It is specially designed to seal and prime all clean masonry surfaces while providing excellent adhesion. Tint N Prime is specially formulated to allow colours to be reproduced with economical tint additions.

- Excellent adhesion
- Tintable
- Superior coverage
- Good hiding power
- Easy spreadability

Superior coverage, ideal product for commercial applications e.g. shopping centres high rise.

Suitable for priming over Novatex rendering systems.

Low VOC content- meets Green Building Council of Australia Green Star IEQ-13 requirements.

TINT N PRIME

HIGH PERFORMANCE TINTABLE PRIMER

Characteristics

Tint N Prime is a high performing, acrylic tintable primer specially designed to seal and prime over rendered surfaces prior to applying Bondi Bling over a variety of surfaces such as brick work, AAC blocks, blue board (Fibre cement sheet) concrete, polystyrene surfaces and specified light weight building substrates when properly prepared.

Preparation

All surfaces must be clean and free from dirt, dust, oil, grease, wax, curing compounds, release agents and other contaminated materials. Glossy surfaces should be lightly sanded and cleaned before priming. Fill cracks and any small imperfections using Flex N Patch. Where mortar joints and other imperfections need to be concealed apply Ezytex Renders according to specifications and leave as a float finish. Tint N Prime can be applied over any Novatex cement based renders after 48 hrs, new concrete surfaces should be left to cure for a minimum of 28 days and cement renders left to cure for a minimum of 7 days.

Mixing

Tint N Prime is a pre mixed product that is supplied white in colour and can be tinted to most modern colours.

Application

Once substrate has been appropriately prepared in accordance with the above instructions using a brush or roller, apply one coat of Tint N Prime onto surface. Tint N Prime can be tinted to the same colour of the texture being used. Once Tint N Prime has been applied allow to cure for 24 hrs prior to applying texture. For applications not mentioned contact Novates for information.

Drying Time

Dries in approximately 24 hours under normal drying conditions. (dry times may vary with changes in temperature, humidity and residual moisture in the substrate).

Coverage

A 15ltr pail of Tint N Prime will cover approximately 90 m².

Cleaning

Keep out of sewers and storm water. Sweep up spills. Novatex Tint N Prime can be cleaned off equipment with water, provided the compound has not dried.

Shelf Life

12 months when stored in a dry place, in original unopened packaging.

Precautions

Do not apply in temperatures below 5°c or above 35 °c or application in extreme conditions such as high wind, direct sunlight, rain and water runoff.
